# Hydraulic Clamshell Bucket

**Save time and money with the DBR Series Hydraulic Clamshell Buckets from Boscaro.**

The Boscaro A-400DR & A-800DR are hydraulically operated clamshell buckets designed to work as large volume transfer bins in conjunction with a mobile and/or tower cranes.

These systems' dumping mechanisms are controlled by a wireless remote control from the crane cab or by designated personal working with your crane operator, who can be up to 100' away from the bin at time of offloading.

All Boscaro equipment meets or exceeds all ASME requirements and is certified for use across North America.

"Boscaro products have proven time and time again their quality, safety, and durability. Boscaro products continue to offer significant value on our projects."

**ED HAWTHORNE, Safety Manager**  
**Walsh/PCL- JV II**

"The best money we've ever spent on crane accessories."
