Bigfoot Crane Company has taken innovation to new heights by collaborating with Boscaro to design modular lifting frames, adapting the original EZBar spreader bar design and enhancing the functionality of their proprietary modular spreader bars. This new product aims to address the unique challenges posed by lifting and hoisting operations in various industries.

The new lifting frame, achieved by linking the spreader bars sections to corner frames, seamlessly integrate with EZBar Spreader Bars, creating a robust lifting frame that ensures optimal load distribution and stability. This innovative design not only enhances the overall performance of the lifting equipment but also demonstrates the commitment of both companies to providing cutting-edge solutions for the evolving needs of the lifting and construction industry.

With the introduction of these modular lifting frames, Bigfoot Crane Company continues to redefine standards in crane technology and contribute to safer and more efficient lifting operations.

Features

- ✔ Range from 1.31M/4' to 10.36M/34'
- ✔ Lifting Capacities up to 110 Tonnes/242,506lbs
- ✔ Reduces the need for multiple spreader bars and decrease head room needed from crane hook to the top of the load
- ✔ Increased stability during lifting operations
- ✔ Evenly distributes the load across multiple lifting points.
- ✔ Adaptable for various lifting applications
- ✔ Reduces the likelihood of load tilting or misalignment.
- ✔ Galvanized for Durability
- ✔ Easily Transported & Stored
