## OUTRIGGER PADS AND PLATES FEATURES AND BENEFITS

- **ENHANCED STABILITY**
- **DURABLE CONSTRUCTION**
- **LIGHTWEIGHT AND EASY TO HANDLE**
- **VERSATILE USE**

Outrigger Pads and Plates are designed to provide a stable and secure foundation for cranes and heavy equipment on job sites. Constructed from high-quality wood or steel, these pads and plates offer a durable and reliable solution that evenly distributes the weight of the equipment, reducing the risk of sinking or shifting on soft or uneven ground.

## CUSTOMIZATION

Bigfoot Crane Company offers customization options for outrigger pads and plates, allowing you to select the appropriate size, shape, and load capacity for your specific needs. Whether you require larger pads for heavier equipment or specialized shapes for unique job site conditions, Bigfoot Crane Company can tailor the outrigger pads and outrigger plates to ensure optimal performance and safety.
