-  training@bigfootcrane.com
-  academy.bigfootcrane.com

Taught by an accomplished crane and rigging instructor, the Full Scope Certification Program combines in-class theory content with on-crane practical experience. Students are provided access to folding boom cranes and gain hours of operation through one-on-one practical training from a certified instructor. The goal of the Full Scope Training Program is to prepare students for the certification assessment, which takes place on the last day, and to start their career as a safe, knowledgeable, and fully certified crane operator

Course Outline

- Pre-operational Inspection and Equipment Logbook
- Hazard Assessment, Incident Reporting & Electrical Safety
- Rigging and Crane Load Charts
- Radio Communications and Hand Signals
- Folding Boom Orientation Including Setup, Load Lifting, Load Control and Demobilization
- Written Lift Plans for Critical Lifts
- WorksafeBC Regulations, ASME Codes and CSA Standards Related to Crane Safety

Investment :

\$11,950.00 + 5% GST

Course Components :

- Level 1 Rigging Certification
- Common Core Crane Theory
- On-Crane Practical Training
- Full Scope Certification Assessment

Certification Assessment

Assessment is completed by a Fulford Certification assessor, who determines if you pass or fail. After you are certified as a Folding Boom 22 Tonne & Under crane operator, you may begin your career with no operating restrictions.

If you want to take the next step and operate hydraulic cranes, you may submit an application to SkilledTrades BC and register as an apprentice through your employer.
