

SAFE EFFICIENT STRONG

Engineered for job sites that demand quick adjustments, high performance, and unmatched safety, the Boscaro ESB Telescopic Spreader Bars deliver a fixed lifting capacity across all configurations, making them ideal for lifting long, awkward, or heavy loads with confidence and precision.

The ESB-15 and ESB-30 offer a telescoping feature that eliminates the need for additional components or reconfiguration on site. Adjust your spreader bar length without tools, saving valuable time on every lift. This plug-and-play modularity makes it ideal for construction, shipping yards, heavy equipment handling, and general industrial use.

Special Update:

Due to highly fluctuating steel prices, Bigfoot Crane Company reserves the right to change its pricing to reflect these changes at any time, and on any open quote issued. We understand this may result in unexpected cost fluctuation, and we are doing everything possible to reduce impact on our customers.

If you have questions, concerns or to get a quote please call 1-855-598-3915. ■

**Thank you for your
